Professional Summary

Senior Angular Developer with 5+ years of experience developing scalable enterprise web applications using Angular, TypeScript, JavaScript, RxJS, NgRx, Angular Signals, and REST APIs, with strong knowledge of backend integration. Strong expertise in reusable component architecture, state management, reactive programming, lazy loading, change detection optimization, code splitting, and frontend performance engineering. Experienced in developing data-driven dashboards and visualization applications using Angular and D3.js. Working knowledge of Java, Spring Boot, RESTful APIs, microservices, Hibernate/JPA, and SQL, with strong experience integrating frontend applications with backend services. Proven experience in end-to-end feature development and ownership, code reviews, unit testing, production issue resolution, and collaboration with Product, Backend, and QA teams in Agile/Scrum environments.

Technical Skills

Frontend: Angular (14, 17, 19), TypeScript, JavaScript, HTML5, CSS3, SCSS, RxJS, NgRx, Angular Signals, Reactive Forms, Angular Router

Angular Architecture & Performance: Component-Based Architecture, Reusable Components, Lazy Loading, OnPush Change Detection, Change Detection Optimization, Code Splitting, Tree Shaking, Bundle Optimization, Responsive Design, Cross-Browser Compatibility

RxJS & State Management: Observables, Subjects, BehaviorSubject, RxJS Operators, Reactive Programming, Asynchronous Programming, State Management, NgRx Store, Actions, Reducers, Selectors, Effects

API & Integration: REST APIs, Angular HttpClient, HTTP Interceptors, Authentication, Authorization, API Error Handling, Microservices Integration, Postman

Data Visualization: D3.js, Interactive Dashboards, Data Visualization, Data-Driven UI

Testing: Jasmine, Karma, Unit Testing, Component Testing, Testable Architecture

Backend: Java, Spring Boot, Hibernate/JPA, JDBC, RESTful Services, Microservices

Databases: SQL, MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS, ECS, S3, Docker, Jenkins, GitHub Actions, CI/CD

AI & Developer Productivity: Generative AI, Prompt Engineering, GitHub Copilot, AI-Assisted Development

Tools & Collaboration: Git, GitHub, Bitbucket, Jira, Confluence, Postman, VS Code, npm, Angular CLI, Datadog, Coralogix

Methodologies: Agile, Scrum, SDLC, Code Review, Continuous Integration, Continuous Delivery

Professional Experience

NielsenIQ (NIQ) — Senior Frontend Developer

Sep 2025 – Present

- Develop and deliver scalable frontend features for NIQ Discover, an enterprise data visualization platform, using Angular, TypeScript, RxJS, Angular Signals, HTML5, CSS3, and SCSS.
- Design and develop 20+ reusable Angular components for enterprise workflows, improving UI consistency and reducing duplicate development effort across application features.
- Build responsive and data-driven user interfaces for complex business workflows and interactive visualization experiences, ensuring usability and cross-browser compatibility.
- Optimized data-intensive Angular screens using OnPush change detection, lazy loading, RxJS optimization, and rendering techniques, reducing unnecessary UI updates and improving application responsiveness.
- Integrate Angular applications with RESTful backend services using Angular HttpClient, HTTP Interceptors, asynchronous programming, authentication/authorization, and structured API error handling.
- Apply RxJS and reactive programming patterns to manage asynchronous data streams, API calls, subscriptions, and complex frontend workflows while minimizing unnecessary network requests.
- Analyze and troubleshoot frontend issues using browser developer tools, application logs, API debugging, and root-cause analysis to improve application stability and production reliability.
- Conduct peer code reviews and contribute to technical design discussions, ensuring adherence to clean coding standards, reusable architecture, scalability, and frontend best practices.
- Collaborate with Product, Backend, QA, UI/UX, and cross-functional teams to analyze requirements, estimate work, resolve technical issues, and deliver production-ready features within Agile/Scrum sprints.

Tata Consultancy Services (TCS) — Frontend Developer

Oct 2021 – Aug 2025

Project: NIQ Discover – Data Visualization Platform

- Built reusable and modular Angular components for a data-driven visualization platform, improving consistency, maintainability, and component reusability across application features.
- Developed responsive frontend features using Angular, TypeScript, RxJS, HTML5, CSS3, and SCSS while following component-based architecture and clean coding practices.
- Integrated frontend modules with REST APIs and collaborated with Backend and QA teams to deliver scalable, production-ready features.
- Refactored legacy frontend code to improve maintainability, reduce technical debt, and simplify future feature development.
- Increased application reliability through structured unit and component testing using Jasmine and Karma.
- Participated in code reviews, defect troubleshooting, requirement analysis, sprint planning, estimation, and Agile delivery activities.

Project: Walmart E-Commerce Application

- Developed responsive and interactive dashboards using Angular, TypeScript, and D3.js to support data visualization and data-driven user experiences.
- Implemented reusable UI components and frontend enhancements while maintaining responsive design and cross-browser compatibility.
- Optimized Angular rendering and UI logic for data-intensive screens by improving change detection and frontend processing strategies.
- Integrated frontend functionality with backend REST APIs and handled asynchronous data flows using RxJS.
- Investigated and resolved UI defects and performance issues while collaborating with cross-functional development and QA teams.

Education

Bachelor of Engineering (Electronics & Telecommunication)

2017 – 2021

University of Pune — CGPA: 8.94

Certifications & Training

Microsoft Certified: Azure Administrator Associate

Microsoft Certified: Azure Security Engineer Associate

Angular Advanced Level Learning

Introduction to Prompt Engineering for Generative AI

Awards & Recognition

On-the-Spot Team Award – Recognized for exceptional project delivery and contribution to critical features.

Applause for Team Award – Recognized for key feature contributions and effective team collaboration.

Service and Commitment Award – Recognized for sustained project contribution and delivery excellence.

Manager Appreciation – Recognized for exceeding performance expectations and demonstrating strong ownership.
