Professional Summary

Frontend Engineer specializing in scalable Angular applications with strong expertise in system design, performance optimization, and reusable architecture patterns. Proven track record of delivering data-driven product features that enhance user engagement, reduce latency, and improve maintainability. Experienced in working within fast-paced Agile teams, driving technical improvements, and maintaining high standards of code quality and engineering excellence.

Technical Skills

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS, RxJS

Architecture & Concepts: Component-Based Architecture, Lazy Loading, Change Detection Strategy, Responsive Design, Cross-Browser Compatibility, Code Refactoring

API & Integration: REST API Integration, HTTP Client, JSON Handling

Testing: Jasmine, Karma, Unit Testing

Backend Exposure: Node.js

Database: MySQL

Tools: Git, GitHub, Bitbucket, Jira, Jenkins, VS Code

Methodologies: Agile, Scrum

Soft Skills

Leadership & Ownership: End-to-end feature ownership, Mentoring junior developers, Accountability

Collaboration: Cross-functional collaboration with Product, Backend, and QA teams

Communication: Clear technical communication, Requirement analysis, Stakeholder interaction

Problem Solving: Strong debugging skills, Analytical thinking, Performance troubleshooting

Work Style: Time management, Adaptability in Agile/Scrum environment, Attention to detail

Professional Experience

NielsenIQ

Sep 2025 – Present

Senior Frontend Developer

- Delivered complex Angular features end-to-end, ensuring scalability, maintainability, and high performance in production environments.
- Led peer code reviews and enforced best practices in component-based architecture, clean coding standards, and UI consistency.
- Optimized application responsiveness for large datasets using change detection strategies and lazy loading techniques.
- Collaborated with cross-functional teams including Product, Backend, and QA to implement seamless REST API integrations.
- Contributed to sprint planning, technical design discussions, and feature estimation in Agile/Scrum environment.

Tata Consultancy Services (TCS)

Oct 2021 – Aug 2025

Frontend Developer

NIQ Discover – Data Visualization Platform

- Built reusable and modular Angular components, improving development efficiency and code reusability.
- Refactored legacy codebase, enhancing maintainability and reducing technical debt.

- Increased code coverage through structured unit testing using Jasmine and Karma.
- Partnered with cross-functional teams to deliver scalable, production-ready features with high code quality.

Walmart E-Commerce Application

- Developed responsive and interactive dashboards using Angular and D3.js for data visualization.
- Reduced API rendering time by optimizing UI logic and Angular change detection strategy.
- Delivered multiple UI enhancement features, improving overall usability and user experience.
- Ensured cross-browser compatibility and responsive design across devices.

Education

Bachelor of Engineering (ENTC) University of Pune CGPA: 8.94	2017 – 2021
Higher Secondary Certificate (HSC) CBSE Board, 71%	2016 – 2017
Secondary School Certificate (SSC) CBSE Board, 72.2%	2014 – 2015

Certifications

Microsoft Certified Azure Administrator Associate
Microsoft Certified Azure Security Engineer Associate
Angular Advanced Level Learning
Introduction to Prompt Engineering for Generative AI

Achievements

On-the-Spot Team Award for exceptional project delivery
Applause for Team Award for key feature contributions
Service and Commitment Award for long-term project excellence
Manager Appreciation for exceeding performance expectations
